This site is intended to shed light on the activities of the Spring Ridge Club in Central Pennsylvania. The activities of this club are to secure land surrounding PA trout waters and post them for their own use. This is damaging to the whole of PA fisheries in that the more streams that are posted from public use, the more pressure public waters will encounter, and will therefore ultimately degrade the experience of fly fishing in Pennsylvania.

If you are considering joining Spring Ridge Club, please browse the information on this site before making a decision.

Thank you

The Anti Spring Ridge Club Club management
